Elevated Salads That Make Your Barbecue Fabulous!

(516) 997-7909

Broccoli Yum Salad

2 medium heads broccoli
2 apples
lemon juice
1 carrot
1 cup blueberries
1 cup dried cranberries
1 cup sunflower seeds
1 cup pecans
1 pkg (2.5 oz) real bacon pieces
Dressing:
1 cup mayonnaise
1/3 cup milk
1/3 cup apple cider vinegar
2/3 cup sugar
2 tbsp poppy seeds

Coarsely chop broccoli and place in large bowl.

Coarsely chop apples and brush with lemon juice to prevent browning; add to bowl.

Shred carrot and add to bowl with blueberries, cranberries, sunflower seeds, pecans and bacon.

To make dressing: Mix mayonnaise, milk, apple cider vinegar, sugar and poppy seeds.

Pour over broccoli salad and mix well.

Recipe courtesy of "Cookin' Savvy"

Potato Salad

3 pounds potatoes
4 boiled eggs, coarsely chopped
2 dill pickles
1 tbsp garlic powder
1 tbsp onion powder
1 pkg (2 1/2 oz) real bacon pieces
2 cups mayonnaise
2 tbsp mustard
salt, to taste
pepper, to taste
smoked paprika, for garnish

Coarsely chop potatoes. In Dutch oven, boil until fork tender. Drain then add coarsely chopped eggs and pickles.

Add garlic powder, onion powder, bacon pieces, mayonnaise & mustard.

Season with salt and pepper, to taste.

Mix well.

Transfer to large bowl and refrigerate 1-2 hours.

Garnish with smoked paprika.

Recipe courtesy of "Cookin' Savvy"

EARTH TALK

From the Editors of E/The Environmental Magazine

What's up with efforts to restore wild salmon to the U.S. West? – J.D. via email

Over the past century, wild salmon populations on the U.S. West Coast have declined drastically. In Washington State alone, salmon populations have dropped to as little as five to 10 percent of their historical numbers, according to the Recreation and Conservation Office. In response, efforts to restore them have ramped up as concerns grow about their survival.

Salmon play a crucial role in the environment, supporting ecosystems, fishing industries and Indigenous communities that have depended on them for centuries. But between habitat destruction, overfishing and climate change, the numbers really took a hit. In recent years, there's been a big push to restore them, with new projects and funding, though overall progress has been inconsistent in certain areas.

One of the biggest problems is that salmon habitats have changed over time. Dams block their migration routes, making it harder for them to reach the places where they spawn. Some projects, such as those on California's Yuba River, are working on removing barriers or building special passages so salmon can get through easier. Another issue is water temperature—rivers are getting too warm because of climate change and salmon need cold water to survive. In some areas people have been planting more trees along riverbanks to help provide more shade but it's a

slow process. Plus, erosion causes too much dirt in the water which can end up burying salmon eggs before they can hatch.

There's been a lot more funding lately to help salmon recover, but this isn't a new effort. Since the 1990s, billions of dollars have been invested in salmon restoration across the Pacific Northwest, with funding from federal, state and tribal governments. In 2023, the U.S. Congress allocated an additional \$60 million to support restoration projects, with the National Oceanic and Atmospheric Administration (NOAA) leading multi-agency federal efforts to improve wild salmon populations. Some hatcheries are also stepping in, raising salmon to release into the wild, though some scientists worry that hatchery fish might not act like real wild salmon and could mess with natural populations.

But even with all these efforts, salmon still have a lot of problems. Climate change is making rivers drier in some places and flooding in others, which totally throws off their migration. Plus, there's still a debate over whether big dams should be taken down to let salmon move freely again. Meanwhile, predators like sea lions have been snatching up more salmon lately, making it even harder for the fish to bounce back.

To help, check to see if seafood is sustainably caught, support policies that protect salmon, and volunteer for local conservation projects. And of course, tackling climate change matters, because without fixing bigger environmental issues, salmon recovery will be an uphill battle.

GOT AN ENVIRONMENTAL QUESTION?
